# SECTION 4 FIRST AID MEASURES

## First Aid Measures:

#### Inhalation:

If symptoms are experienced, move victim to fresh air and obtain medical advice.

#### **Ingestion:**

Rinse mouth. Drink 1 or 2 glasses of water. If irritation or discomfort occurs, obtain medical advice immediately. **Skin:** 

Wash with soap and water. If irritation persists, obtain medical advice.

#### Eye:

Do not allow victim to rub eye(s). Flush with lukewarm, gently flowing water for 5 minutes or until particle is removed. If irritation persists, obtain medical attention.

#### Most Important Symptoms and Effects, both Acute and Delayed:

#### Inhalation:

Exposure to excessive amounts of dust may cause physical irritation to respiratory tract.

#### **Ingestion:**

Low acute toxicity. Ingestion is a minor route of entry for intended use of this product.

#### Skin:

May be non-irritant.

#### Eye:

May cause transient slight irritation.

#### **Chronic Effects:**

Prolonged inhalation of excessive amounts of dust may cause lung damage. Use of this product as intended does not result in inhalation of excessive amounts of dust.

#### Indication of Any Immediate Medical Attention and Special Treatment Needed:

None

## SECTION 5 FIRE FIGHTING MEASURES

## **Extinguishing Media:**

Suitable Extinguishing Media:

CO2, water, dry chemicals

#### **Unsuitable Extinguishing Media:**

None

## **Special Hazards:**

Can form explosive dust-air mixtures when finely dispersed in air.

## **Hazardous Combustion Products:**

<u>CO2, CO</u>

#### **Advice for Fire-fighters:**

Wear gloves, glasses, a mask if necessary.

## SECTION 6 ACCIDENTAL RELEASE MEASURES

**Personal Precautions, Protective Equipment and Emergency Procedures:** 

Avoid breathing dust. Wash thoroughly after handling.

#### **Environmental Precautions:**

Do not wash away into sewer.

## Methods and Material for Containment and Cleaning Up:

Sweep slowly spilled powder on to paper, and carefully transfer into a waste container. Clean remainder with wet paper, wet cloth or a vacuum cleaner.

If a vacuum cleaner is used, it must rate as a dust explosion-proof type. Fine powder can form explosive dust-air mixtures.

# SECTION 7 HANDLING AND STORAGE

#### **Precautions for Safe Handling:**

Avoid breathing dust. Wash thoroughly after handling. Use with adequate ventilation.

## Conditions for Safe Storage, Including Any Incompatibilities:

Keep out of the reach of children.

Keep away from oxidizing materials.

## Specific End Uses:

Toner for electrophotographic apparatus. For more information, please refer to the instruction of this product.

# SECTION 11 TOXICOLOGICAL INFORMATION

## Information on Toxicological Effects:

#### Acute Toxicity: Inhalation:

Not available

Ingestion:

## Estimate: Rat, LD50 > 2000 mg/kg (See SECTION 16)

#### **Corrosivity/Irritation:**

Skin:

Estimate: Rabbit, non-irritant (See SECTION 16)

Eye:

Estimate: Rabbit, transient slight conjunctival irritation only. (See SECTION 16)

## Sensitization:

#### Skin:

Estimate: Non-sensitizing (See SECTION 16)

## **Repeated Dose Toxicity:**

Muhle et al. reported pulmonary response upon chronic inhalation exposure in rats to a toner enriched in respirable-sized particles compared to commercial toner. No pulmonary change was found at  $1 \text{ mg/m}^3$  which is most relevant to potential human exposure. A minimal to mild degree of fibrosis was noted in 22% of the animals at  $4 \text{ mg/m}^3$ , and a mild to moderate degree of fibrosis was observed in 92% of the animals at 16 mg/m<sup>3</sup>.

These findings are attributed to "lung overloading", a generic response to excessive amounts of any dust retained in the lung for a prolonged interval.

## **Carcinogenicity:**

The IARC evaluated titanium dioxide as a Group 2B carcinogen, for which there is inadequate human evidence, but sufficient animal evidence. The latter is based upon the evidence such as development of lung tumors in rats receiving chronic inhalation exposure to powdered titanium dioxide at levels that induce particle overload of the lung.

However, there is an inhalation study of a toner containing titanium dioxide which suggested no association between toner exposure and tumor development in rats.

## **Mutagenicity:**

Ames Test (S. typhimurium, E. coli): Negative

## **Toxicity for Reproduction:**

Not available
